SWING-UP CENTER POST DOOR SYSTEM

FLEXIBLE. RELIABLE. DURABLE.
Changing the way you view overhead doors.

ENERGY EFFICIENT

Innovation

The Swing-Up Center Post Door System from American Door Works is a custom solution for your large door needs. This innovative system provides flexibility, convenience, conserves energy, and the swing-up post transforms your garage door opening to the size you need – up to 50' wide.

This innovative system provides flexibility of sectional overhead doors, paired together with a revolutionary swing-up post.

Four Simple Steps

In four simple steps, the Center Post System provides you the convenience, speed and flexibility you need any time an extra large door is required. With both doors open, the post swings out of the way allowing you to move large equipment in and out of your storage area quickly and easily.

The system also saves energy by allowing you to quickly open only the size door you need – using the Center Post only when it's necessary for larger equipment. Simple, flexible and convenient, this door solution was created with your custom needs in mind.

Step One:

Raise Doors

To operate the Center Post Door System simply raise both electrically operated sectional overhead doors.

Step Two:

Unlatch Post

Unlatch the post from the floor strike.

COMMERCIAL Operators & Accessories

Featuring commercial operators from LiftMaster®, American Door Works has the right solution for your automatic door opening needs. LiftMaster® offers the most comprehensive and innovative line of operators in the industry. With accessories including safety devices and radio controls, your door will always operate safely and efficiently. And, to make sure your door is operating when you need it most, ask your American Door Works professional about scheduling regular preventive maintenance visits.

Step Three:

Raise Post

Simply push a button to raise the post, creating a full-width opening.

Step Four:

Move Equipment Through Opening

To close: Lower the post, latch to floor strike and close doors.

FLEXIBLE
